

# Data analytics drives excellent organizations: how to move from good to great?

Shift to the next gear in process improvement: Leverage your data company-wide to get outstanding business results.

## DIAGNOSE - PROBLEM SOLVING

Voice of the customer  
Data collection & cleaning  
Contextualization

## DIVE INTO DATA

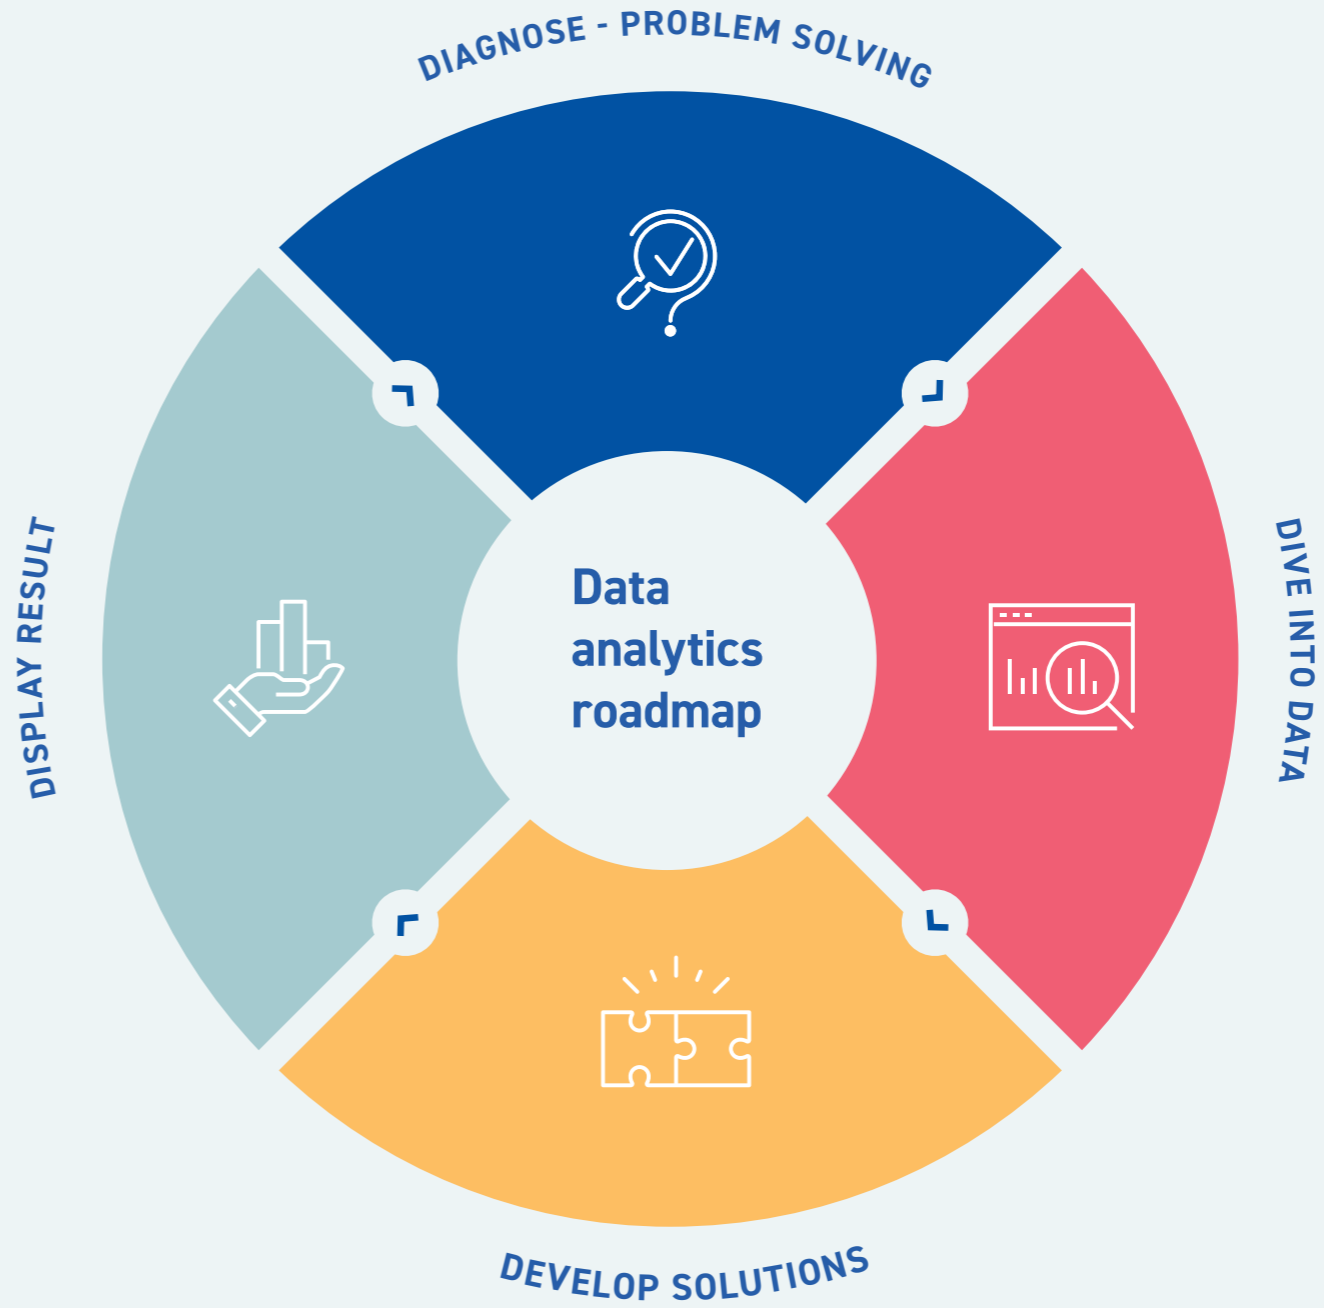

Process mining  
Advanced statistics  
Augmented intelligence

## DEVELOP SOLUTIONS

Modelling (digital twin)  
What-if scenario simulation

## DISPLAY RESULTS

Dashboard

## Raising the bar

Setting ambitious targets

Together with you

Short & long term results

Tailoring the approach

Supply chain

- Footprint optimization
- 11% reduction of operational and logistics costs

Office processes

- Unravelling complexity in office processes
- Determine bottleneck(s) & reduced time to market

Future investments

- Impact simulation of future investments
- Data-driven decision making

Energy consumption

- Optimize energy consumption
- 20% reduction in electricity consumption
